COMMUNITY SURVEY RESULTS

Nohopapa conducted community engagement for the project from August 2021 to January 2022. Utilizing a multi-phase approach, the engagement process consisted of identifying relevant community organizations, reaching out to them to participate (Appendix A: Community Participation Letter), conducting survey questionnaires via phone or online (Appendix B: Community Survey Questions), summarizing the surveys and community mana’o, analyzing the data, and preparing a summary of findings (see Community Survey Results section).

Thirty (30) organizations/individuals were contacted to participate, fourteen (14) organizations participated in the project, fourteen (14) organizations initially responded, but did not complete the survey within the project timeframe, ten (10) organizations could not be reached, and 2 (two) organizations no longer operate in Wai’anae.

Table 19 includes information on the organization name, primary contact person, contact information, and the ahupua’a they are primarily based at. The Map Numbers in the left-hand column of the table correspond with the map below (Figure 79) that illustrate where the organizations are either based or conduct their service activities.

We mahalo all who shared their time and ‘ike for this inventory. Without their mana’o, this inventory of community-based organizations in Wai’anae could not have been completed. The mana’o shared will help KS to (1) Evaluate the opportunities and appropriateness of cultural sites for learner and ‘ohana engagement, (2) Identify initial stages and resources for coordinating community/‘ohana engagement and educational opportunities, (3) Support the development of ‘Āina Based Education (ABE) and Hawaiian Culture Based Education (HCBE), (4) Create processes to build a shared community sense of place, and (5) Support the development of collaborative and innovative strategies to increase availability and access to quality ABE and HCBE educational opportunities for learners in the region.
